(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box below to indicate the rule pursuant to which the form is being filed and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

SECTION 1 - CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report.

Cypress Semiconductor Corporation (including its consolidated subsidiaries, the "Company") is filing this Form SD pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 for the reporting period from January 1, 2017 to December 31, 2017.

Conflict Minerals Disclosure

The description of the Company's reasonable country of origin inquiry ("RCOI") and the results of the RCOI and due diligence on source and chain of custody are included in the Conflict Minerals Report attached as an exhibit to this Form SD. The Conflict Minerals Report is also available on the Company's website at <http://www.cypress.com/documentation/other-resources/cypress-semiconductor-conflict-mineral-policy>.

Item 1.02 Exhibit.

A copy of the Company's Conflict Minerals Report is filed herewith as Exhibit 1.01.

SECTION 2 - EXHIBITS

Item 2.01 Exhibits.

Exhibit 1.01 Conflict Minerals Report of the registrant as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

CYPRESS SEMICONDUCTOR CORPORATION

Date: May 25, 2018

By: /s/ Thad Trent

Name: Thad Trent

Title: Executive Vice President, Finance and Administration
and Chief Financial Officer

Description

1.01 Conflict Minerals Report of the registrant as required by Items 1.01 and 1.02 of this Form.

Cypress Semiconductor Corporation
Conflict Minerals Report
For The Calendar Year Ended December 31, 2017

This Conflict Minerals Report (the “Report”) for Cypress Semiconductor Corporation (the “Company,” “Cypress,” “we,” or “us”) is provided in accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”) for the reporting period from January 1 to December 31, 2017. The Rule requires the disclosure of certain information by companies that manufacture or contract to manufacture products that use minerals specified in the Rule that are necessary to the functionality or production of these products. These minerals are columbite-tantalite (coltan), cassiterite, wolframite, gold, or their derivatives, which the SEC has limited to tantalum, tin, tungsten and gold (collectively, “3TG”). The “Covered Countries” for purposes of the Rule and this Report are the Democratic Republic of the Congo (“DRC”), the Republic of Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

Certain products that we manufacture, including integrated circuits, contain 3TG. We do not have direct relationships with the originating mines or smelters of 3TG that are used in our products. Due to the depth of the supply chain, we are far removed from the sources of ore from which 3TG are produced and the smelters/refiners that process the ores. Consequently, we rely on our direct suppliers as well as the Responsible Minerals Initiative (“RMI,” formerly the Conflict Free Sourcing Initiative) for source information on 3TG in our products.

COMPANY OVERVIEW

Cypress is a global supplier for innovative companies in high-growth markets. Cypress delivers high-quality, value-driven embedded solutions. Our product portfolio includes secure wireless technology, microcontrollers, memories, analog integrated circuits and USB controllers. We serve numerous major markets, including automotive, industrial and consumer electronics markets. 3TG can be found in our products.

Cypress also has the following two majority-owned subsidiaries:

- AgigA Tech, Inc. (“AgigA”) is an industry pioneer in the development of high-speed, high-density, battery-free non-volatile memory solutions. Its flagship product, AGIGARAM®, merges NAND Flash, DRAM and an ultracapacitor power source into a highly reliable non-volatile memory subsystem, delivering unlimited read/write performance at RAM speeds, while also safely backing up all data when power is interrupted. 3TG can be found in AgigA’s products.
- Deca Technologies Inc. (“Deca”) has pioneered a breakthrough approach to wafer level packaging and interconnect technology inspired by SunPower Corporation’s unique solar wafer fabrication methodology. Deca’s product offering includes a series of wafer level chip scale packaging (“WLCSP”) solutions serving semiconductor manufacturers. Deca’s approach enables industry-leading cycle times, flexibility and value for WLCSP, which is one of the semiconductor industry’s fastest growing electronic interconnect technologies. Certain Deca processes contain tin and tungsten.

As required by the Rule, this Report covers the RCOI (as defined below), due diligence and related activities of Cypress and its subsidiaries.

FORWARD-LOOKING STATEMENTS

Statements herein that are not historical facts and that refer to the Company or its subsidiaries’ plans and expectations for the future are forward-looking statements made pursuant to the Private Securities Litigation Reform Act of 1995. We may use words such as “may,” “should,” “expect,” “plan,” “intend,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “future,” “continue” or other wording indicating future results or expectations to identify such forward-looking statements that include, but are not limited to, statements related to due diligence improvements. These forward-looking statements are not a guarantee of future performance. Such statements reflect our current expectations, which

are based on information and data available to our management as of the date of this Report. Events and actual results may differ materially due to a variety of risks and uncertainties, including, but not limited to, the risks and uncertainties described in the "Risk Factors" section below and in the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our most recent Annual Report on Form 10-K and our other filings with the Securities and Exchange Commission. We assume no responsibility to update any such forward-looking statements.

REASONABLE COUNTRY OF ORIGIN INQUIRY ("RCOI")

To identify which of our suppliers to survey regarding the source of 3TG used in our products, we inventoried our products to determine which were in scope of the Rule. Products were considered in scope if they were manufactured by us or one of our subsidiaries identified above or contracted for manufacture by us or one of the subsidiaries identified above between January 1, 2017 and December 31, 2017 and were more likely than not to contain 3TG. We surveyed suppliers of tungsten hexafluoride, tantalum targets and gold and tin bond wires, substrates and lead frames, as well as semiconductor foundries and die assembly subcontractors, using these same materials. We also surveyed suppliers of AgigA; the products it sells include semiconductors that could contain 3TG materials. In addition, we surveyed suppliers of our evaluation boards business; the semiconductors, solders and plated surfaces on the evaluation boards may contain 3TG. In addition, Deca surveyed its suppliers. We assessed our industry as well as other industries and confirmed that this approach is consistent with how many peer companies are approaching compliance.

We conducted an RCOI of 59 suppliers we identified using the approach described above that supply parts and materials used in the manufacturing process by the semiconductor devices portion of our business; we received responses from 100% of these suppliers. We also conducted an RCOI of the 15 suppliers that we identified using the approach described above for the remainder of our business and suppliers supplying parts and materials used in the manufacturing process by AgigA; we received responses from 100% of these suppliers. Deca conducted an RCOI of 3 suppliers that they identified using the approach described above and received responses from 100% of those suppliers.

Direct material suppliers were asked to utilize the Electronic Industry Citizenship Coalition/Global e-Sustainability Initiative Conflict Minerals Reporting Template ("EICC CMRT") to report on their usage and sourcing of materials containing 3TG. The EICC CMRT was developed by several of the world's leading consumer electronics companies and is generally regarded as the preferred reporting tool for conflict minerals content and sourcing information.

RCOI RESULTS

We validated declarations on 3TG from an aggregate total of approximately 74 suppliers for Cypress, AgigA and Deca. These validated declarations listed a total of approximately 391 smelters and refiners. Some of these suppliers provided information at a part number level and were able to specifically identify the smelters from which their 3TG were procured. The remainder of our suppliers provided their complete list of smelters, but they were unable to identify the specific smelters from which 3TG used for our products were procured. As many of the declarations we received are company-wide and not product specific, we believe these declarations may include smelters and refiners that do not provide 3TG that are used in our products. Due to the many company-wide declarations and the multiple levels of suppliers in our supply chain we are unable to determine with certainty at this time a complete list of smelters and refiners listed in the validated declarations that actually provide the specific 3TG used in our products. However, we believe the suppliers to the semiconductor devices portion of our business may use those smelters and refiners listed on Exhibit A attached hereto. In addition, we believe the smelters and refiners used for the remainder of our business, including AgigA and Deca, may include those smelters and refiners listed on Exhibit B attached hereto. There are 234 overlapping smelters that are included on both exhibits.

As many of the declarations are company-wide and not product specific, we believe these declarations may include countries of origin for 3TG that may not be used in our products. Due to the many company-wide declarations and the multiple levels of suppliers in our supply chain we are unable to determine with certainty, at this time, a complete list of which countries of origin listed in the validated declarations actually provide the specific 3TG used in our products. However, using the countries listed for the levels, in RMI's RCOI data file (L1, L2, L3, DRC and R/S), associated with the smelters listed in Exhibit A (L1, L2, L3 and DRC) the 3TG in Cypress' supply chain could have originated from the following countries:

Argentina, Australia, Austria, Benin, Bolivia (Plurinational State of), Brazil, Burkina Faso, Burundi, Cambodia, Canada, Chile, China, Colombia, Democratic Republic of the Congo, Ecuador, Eritrea, Ethiopia, France, Germany, Ghana, Guatemala, Guinea, Guyana, Honduras, India, Indonesia, Japan, Kazakhstan, Laos, Madagascar, Malaysia, Mali, Mexico, Mongolia, Mozambique, Myanmar, Namibia, Nicaragua, Nigeria, Panama, Peru, Portugal, Russian Federation, Rwanda, Senegal, Sierra Leone, Spain, Thailand, Togo, Uganda, United Kingdom of Great Britain and Northern Ireland, United States of America, Uzbekistan, Viet Nam and Zimbabwe.

It is therefore possible that the 3TG included in our products might have originated from a Covered Country.

DUE DILIGENCE DESIGN

We are committed to working with our global supply chain to ensure compliance with the Rule. We have designed our due diligence measures to be in conformity with the internationally recognized due diligence framework in the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (“OECD Framework”) published by the Organisation for Economic Co-operation and Development (“OECD”).

DUE DILIGENCE PERFORMED

Below is a description of our due diligence activities performed for the 2017 reporting year as they relate to the five-step OECD Framework. The same activities were performed for AgigA and Deca, and for our evaluation board business.

OECD Step 1: Establish Strong Management Systems

- Our conflict minerals policy is available on our website at <http://www.cypress.com/documentation/other-resources/cypress-semiconductor-conflict-mineral-policy>.
- We have an internal team consisting of members from the corporate legal team, the corporate social responsibility team and the global supply chain management team. This team meets regularly to discuss due diligence measures being taken.
- Senior management is provided regular updates on the status of the Company’s conflict minerals compliance program.
- We use a third-party software application to roll-up all of the suppliers’ final RMI Conflict Minerals Reporting Templates (“CMRT”) into a Cypress CMRT, which contains all smelters and refiners purported to be in our supply chain and the associated direct sourcing codes (as reported by the Responsible Minerals Assurance Process (“RMAP”).
- We have added conflict minerals requirements to our standard purchasing terms and conditions, which is available on our website at www.cypress.com/terms-conditions.
- We are a member of the Conflict-Free Sourcing Initiative, which provides us access to the RMAP conformant smelters and refiners lists and the RMI plausible countries and RCOI data file.

OECD Step 2: Identify and Assess Risks in the Supply Chain

- We requested that our in-scope suppliers provide their sourcing of 3TG in accordance with current industry reporting formats and approved smelter lists.
- We evaluated supplier responses for plausibility, consistency and gaps, both in terms of which products were stated to contain or not contain 3TG, and the origin of 3TG. We validated the information received from our suppliers, to the extent possible, by reviewing individual supplier responses for inconsistencies, comparing different supplier responses for inconsistencies, and checking the conflict-free status of smelters and refiners on the RMI’s website.
- We made additional inquiries to our direct suppliers with the goal of improving our understanding of their supply chains whenever responses appeared inaccurate, incomplete, or suspect.
- As we became aware of instances where 3TG in our supply chain had the potential to finance armed groups, as defined in the Rule, we worked with our suppliers to find alternate sources that are compliant with RMI’s conflict-free smelter and refiner protocols.

OECD Step 3: Design and Implement a Strategy to Respond to Identified Risks

- We communicated our policy on conflict minerals to direct suppliers with an unsatisfactory response and requested suppliers to commit to supporting our policy on preventing the purchase of 3TG that has the potential to finance armed groups in the Covered Countries.

- We followed up with the suppliers surveyed on missing and inconsistent information. Additional supplier correspondence was conducted to address the following issues: (i) making implausible statements regarding the presence of no 3TG, (ii) failing to complete each question in the EICC CMRT, (iii) failing to identify smelters or refiners, (iv) indicating a sourcing location without complete supporting information from the supply chain, and (v) claiming that the supplier used a smelter or refiner that we were unable to verify through further analysis and research.
- We support the development and implementation of independent third-party audits of smelters/refiners' sourcing practices through our policy and procurement practices that encourage suppliers to purchase materials from RMI compliant smelters/refiners.

OECD Step 4: Carry Out Independent Third-Party Audit of Smelters/Refiners' Due Diligence Practices

- We support audits of mineral smelters and refiners conducted by third parties through our membership in the RMI (Member Code: 6139), which operates the RMAP.
- This membership also provides us with access to audits of mineral smelters and refiners conducted by the London Bullion Market Association ("LBMA") and Responsible Jewellery Council ("RJC"). The RMI has established a cross-recognition program for LBMA and RJC initiated audits of gold refiners.
- We use data provided by the RMI to determine which smelters and refiners are conformant with RMAP protocols and conform to the OECD Framework, as appropriate.

OECD Step 5: Report Annually on Supply Chain Due Diligence

- We publish our CMR annually, and our reports are available on our website at <http://www.cypress.com/documentation/other-resources/cypress-semiconductor-conflict-mineral-policy> and are also filed with the U.S. Securities and Exchange Commission.

RISK FACTORS

The statements above are based on the RCOI process and due diligence performed in good faith by the Company. These statements are based on the infrastructure and information available at the time the research, analysis, due diligence and report production (as applicable) was conducted. A number of factors could introduce errors or otherwise affect Cypress's conflict minerals research, analysis, due diligence and report production. These factors include, but are not limited to, gaps in supplier data, gaps in smelter or refiner data, errors or omissions by suppliers, errors or omissions by smelters or refiners, the definition of a smelter or refiner not being finalized at the end of the reporting period, all instances of conflict minerals necessary to the functionality or manufacturing of Cypress's products not yet having been identified, gaps in supplier education and knowledge, timeliness of data, public information not discovered during a reasonable search, errors in public data, language barriers and translation mistakes, oversights or errors in conflict free smelter audits, negligence or willful misconduct on the part of suppliers, smelters or refiners, Covered Countries sourced materials being declared

"recycled or scrap" materials, companies going out of business, certification programs being not equally advanced for all industry segments and metals, and smuggling of conflict minerals from the Covered Countries to countries beyond the Covered Countries.

DOCUMENTS INCORPORATED BY REFERENCE

Unless otherwise expressly incorporated by reference or otherwise stated herein, any documents, third-party materials or referenced websites (including the Company's) are neither incorporated by reference in, nor considered to be a part of, this Report.
